

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 1 (currently amended): A method for controlling a computing device with [[an]] a security  
5 device wherein a first identification information is stored in said computing device  
and a second identification information is stored in said security device, said first  
identification information comprising primary first identification information and  
secondary first identification information, said computing device further comprising a  
10 BIOS program and an operation system program, said method comprising the steps  
of:  
executing said BIOS program of said computer system;  
fetching said first identification information and said second identification  
information;  
15 comparing said primary first identification information with said second identification  
information;  
querying whether to update said first identification information in response to said  
second identification information matching said primary first identification  
information;  
comparing said secondary first identification information with said second  
20 identification information; and  
skipping querying whether to update said first identification information, and  
executing said operation system program directly in response to said second  
identification information matching said secondary first identification  
information.  
25 ~~executing said operation system program if said second identification information~~  
~~matches said first identification information.~~

2 (original): The method of claim 1 in which said second identification information does not match said first identification information, further comprising the step of turning off said computing device.

5 3 (original): The method of claim 1 in which said second identification information does not match said first identification information, further comprising the steps of:  
querying whether to turn off said computing device or to fetch said second  
identification information again;  
fetching said second identification information from said security device; and  
10 comparing said second identification information with said first identification  
information.

4-18 (cancelled)

15 19 (original): A computing system comprising :  
an administrator security device having a primary second identification information  
stored therein;  
a computing device having a plurality of first identification information, a BIOS  
program and an operation system program stored therein, wherein said plurality  
20 of first identification information comprises a primary first identification  
information and a secondary first identification information, said computing  
device executing said BIOS program, fetching said primary second  
identification information from said administrator security device, comparing  
said primary second identification information with said plurality of first  
25 identification information, and determining that said primary second  
identification information matches said primary first identification information,  
and querying whether to update said first identification information or not; and  
a user security device having a secondary second identification information stored

therein,

wherein if said computing device is instructed to update said first identification  
information, said computing device fetches said secondary second identification  
information from said user security device and updates said first identification  
5 information to match said secondary second identification information.

20 (original): The computing system of claim 19, wherein said computing device updates  
said primary first identification information to match said secondary second  
identification information.

10

21 (original): The computing system of claim 19, wherein said computing device updates  
said secondary first identification information to match said secondary second  
identification information.

15 22 (original): The computing system of claim 19, wherein updating said first  
identification information is executed by said BIOS program.

23 (original): The computing system of claim 19, wherein updating said first  
identification information is executed by said operation system program.

20
